To whom it may concern,

**RE : Professional Reference
Nino Petterlin director of Petcon Developments Pty Ltd**

I have worked with Nino Petterlin as the director of Petcon Developments Pty Ltd, on many successful domestic projects, including a project that received a residential building award from the MBAV.

Nino was contracted to build a highly complex architecturally detailed buildings using the RAI A Lump Sum Contract SBW-2.

As a registered architect I was contracted to design, document and administer these contracts on behalf of my clients.

I found Nino to be a highly experienced, dedicated and committed builder who went over and above board to deliver a high quality product, on time and budget as contracted, often treating the projects as his own.

He works in a very collaborative manner offering all sorts of advice and options to my clients and myself with the aim of improving the end product.

He is a very passionate, hands on builder, encapsulating good building practices, based on experience.

I would happily recommend him to any client who could convince him to work for them.

He is a pleasure to work with.
